Re: Correction to Cover Letter Accompanying the Preliminary Order Requiring Measuring Devices and Controlling Works for Diversions of Water from Sand Creek and tributaries, Administrative Basin No. 21

Dear Water User,

The Idaho Department of Water Resources ("Department") issued the above referenced Preliminary Order ("Order") requiring installation of measuring devices and controlling works for certain water rights authorizing diversion of water from Sand Creek and tributaries. The Order was signed by the Department's Deputy Director on September 25, 2014. The order established a deadline of July 1, 2015 for installation of measuring devices and controlling works on diversions from Sand Creek and tributaries. The cover letter that accompanied the Order dated September 30, 2014, incorrectly showed an installation deadline of April 15, 2015.

Please ignore the April 15, 2015 installation deadline referenced in the September 30, 2014 cover letter and adhere to the correct installation deadline of July 1, 2015 as shown in the Order.

The correct deadlines established by the Order are as follows:

- 1) Holders of water rights listed in Attachment A of the Order shall install measuring devices, and controlling works by July 1, 2015; and**
- 2) Holders of water rights listed in Attachment A of the Final Order shall submit measurement plans to the Department by December 15, 2014.**

I apologize for the error contained in the September 30, 2014 correspondence and for any resulting confusion or inconvenience caused by that oversight. If you have questions concerning this matter, please contact me directly at 208-287-4959.

Respectfully,

Tim Luke
Chief, Water Compliance Bureau
